Chennai

Wipro Inc

May, 2020 - Feb, 2021

- Utilized Java Selenium WebDriver for UI testing and browser automation in a web application development project.
- Developed and maintained test scripts to validate the functionality, performance, and responsiveness of the application across multiple browsers (Chrome, Firefox, and Safari).
- Collaborated with the development team to implement fixes and improve overall application quality.
- Gained experience with test automation frameworks, such as JUnit, to organize and execute test suites.

EDUCATION

Bachelor of Engineering : Computer Science and Engineering

India

Chandigarh University

PROJECTS

Online Musical Band Booking

The ongoing solo project utilizes React Native and Java technologies, as well as an H2 database. Its primary objective is to create a platform where restaurants can search and book musical bands, and where musical bands can make performance requests to restaurants.

Online Food Order with Time Constraint

The project was started as a solo project using vanilla javascript and java as a major tech stack. Standing and waiting for the order of food used to take 80% of student's launch time. We developed a system where any students around the university can pre-order their food from anywhere and also give time constraint as I will be available at this time.

Tutored on Statistical Frameworks

The project was to organize workshop for the junior students to tutor them about statistical frameworks mostly used in Data Analysis and Data Science.

Majorly focusing on: numpy, pandas , matplotlib and seaborn.

Mentored on various small projects like analysis of suicide rates, etc.

ACHIEVEMENTS

AWS Certified Associate Developer

Completed Udemy Course on AWS Developer.

SKILLS

Big data, Java, python, Git & GitHub, Amazon Web Services, Devops, Linux, Javascript/ TypeScript, React, MySQL
